**Monitoring Journal - internship training (in short)**

**Day 1: Tuesday, 13th January 2015, Agrupamento de Escolas de Barcelos**

The trainer Silva Luis presented to the students some important rules specific to working in the informatics laboratory. The participants took the initial assessment. They presented concepts related to the graphics of the project and websites.

**Day 2: Wednesday, 14th January 2015, Agrupamento de Escolas de Barcelos**

The trainer Silva Luis presented notions related to composition, size and the format of the website, advertising and publicity, bookmarks for text formatting, working with lists and tables. The participants applied the information received in designing their own websites.

**Day 3: Thursday, 15th January 2015, Agrupamento de Escolas de Barcelos**

The trainer Ricardo Magalhães interactively presented to the students concepts related to the graphics of the project and site layout, size and format of the site, external links, internal links and working with images. The participants designed a web page similar in appearance to the homepage of the website Twitter and used the application Sublime Text 2.

**Day 4: Friday, 16th January 2015, Agrupamento de Escolas de Barcelos**

The trainer Ricardo Magalhães presented notions of solutions for creating a site, testing different methods to create a site, graphic designs for creating websites, frames, dividing a frame, uploading files into frames. The participants worked in groups of two and applied the knowledge they had acquired to customize their sites.

## PROJECT

### “EUROPEAN MOBILITY FOR THE FUTURE CREATORS OF WEB PAGES”/ “EU-Mob 4 Web”

#### **Day 5: Monday, 19th January 2015, Agrupamento de Escolas de Barcelos**

Summative evaluation of the participants' work was done after the first week of the course. The trainer Ricardo Magalhães continued presenting different solutions of designing a site, testing different methods to create a site and graphic designs for creating websites. The trainer presented different concepts related to the introduction of a form and the elements of a form and styles in CSS syntax. The participants worked with forms, transitions, used instructions in JavaScript, CSS and HTML. They set the themes of the projects to be developed by the participants and the companies for which the participants were to develop web pages.

#### **Day 6: Tuesday, 20th January 2015 - Day 9: Friday, 23rd January 2015, INDOT- IT Company and other companies for which web pages were developed.**

The participants either collected and processed data on companies and developed the website for the presentation of the company or collected and processed data on the mobility experience in Portugal. Every day, the participants were guided by Ricardo Magalhães, the main programmer and owner of the IT company INDOT- to create the website, both at the company headquarters and at the companies allocated to achieve the promotion pages.

#### **Day 10: Monday, 26th January 2015:**

Each team formed of two participants presented their websites in an open seminar. The final evaluation of the project took place and certificates of participation in the mobility were handed over.
